Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Acknowledgment is made of the receipt and entry of the amendment filed on June 6, 2003.

Acknowledgment is made of newly submitted Claim 5.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 5 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor, at the time the application was filed, had possession of the claimed invention. Newly applied as necessitated by amendment.

Claim 5 is rejected under 35 U.S.C. § 112, first paragraph, as failing to provide prior support or antecedent basis for the language "wherein said composition is obtained from wheat proteins by crushing grains of wheat to obtain a flour".

The claims as set forth in the amendment filed July 12, 2001, now recite a process for firming the skin to counter the effects of aging comprising: applying to the skin of a person in need of the same a cosmetologically effective amount of a composition, wherein said composition is obtained from wheat proteins by crushing grains of wheat to obtain a flour". However, nowhere in the specification does Applicant provide literal support for the claimed process

Art Unit: 1654

wherein the claim-designated composition is obtained from any other wheat source other than "fresh wheat".

As the above mentioned claim limitations could not be found in the present specification, the recitation of the claim limitations are deemed new matter; and, therefore they must be omitted from the claim language, unless Applicant can particularly point to the specification for literal support.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 as amended remain rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, lines 11-13, is rendered uncertain by the phrase "the molar mass of a different molecular species present having a principal peak about 15,000 Daltons" because it is unclear as to what the different molecular species present having a principal peak about 15,000 Daltons refers to. Applicant may overcome the rejection by replacing the phrase with whereby the molar mass of the active principle has a principal peak at about 15,000 Daltons.

All other cited claims depend directly or indirectly from rejected claims and are, therefore, also, rejected under U.S.C. 112, second paragraph for the reasons set forth above.

Art Unit: 1654

Although not rising to the level of uncertainty, Claim 3 is rendered awkward by the phrase "are so that the pH is maintained constant between 4.0 and 10.0". Applicant may overcome the rejection by replacing the phrase with is constantly maintained at a pH between 4.0 and 10.0.

Although not rising to the level of uncertainty, Claim 4 is rendered awkward by the phrase "are so that the temperature is maintained between 35 and 80°C". Applicant may overcome the rejection by replacing the phrase with is constantly maintained at a temperature between 35 and 80°C.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
